

## THE NEXT GENERATION GEOPDF® SOLUTION FOR ARCGIS DESKTOP

GeoPDF® Publisher for ArcGIS® Pro is an extension to Esri® ArcGIS Pro that allows you to produce and consume GeoPDF documents with ArcGIS Pro. GeoPDF documents can be shared with the broadest possible audience to extend the reach and value of your investment in ArcGIS. GeoPDF Publisher for ArcGIS Pro gives you unmatched capabilities for configuring and optimizing the PDF documents you create with ArcGIS. Additionally, the GeoPDF documents made with GeoPDF Publisher for ArcGIS Pro are enabled for use with the free GeoPDF Toolbar, an extension to free Adobe® Reader® (or Adobe Acrobat®) that provide a host of interactive capabilities that can be exploited by non-GIS users, including an Identify Tool similar to the one provided by ArcGIS Pro, for inspecting feature attributes, simultaneous display of multiple geographic coordinates, measurements, and geospatial markup.

### SHARE MAPS OUTSIDE THE ENTERPRISE

Only interactive, portable, intelligent GeoPDF maps and imagery produced by TerraGo Publisher allow users to access, update and share compact location intelligence with stakeholders inside and outside the enterprise, between disparate organizations and IT infrastructures, to improve the accuracy and timeliness of information. As a gold partner of Esri and Adobe, TerraGo complements and extends ArcGIS by bridging the gap between an organization and its stakeholders to fully support collaborative decision making.

### CONTROL GEOPDF LAYERS & ADD HYPERLINKS

Publisher transforms static maps and imagery into powerful geospatial applications, with advanced features such as precision layer control — which provides users with fine tune control over which layers to turn on and off in a GeoPDF — and hyperlinking to documents, photos and files on a shared server from within the TerraGo workflow, which extend the value of traditional GIS systems and existing geospatial data.

## FEATURES

- Export options including:
  - Layout View Exports
  - Graphic Image Resolution
  - Graphic Vector
  - GeoPDF
  - Insert PDF
- Advanced layering features for GeoPDF, labelings, schemes, and actions
- Embed attributes in a GeoPackage format
- Support for ArcGIS Pro 2.4, 2.5, and 2.6

# PRODUCT OVERVIEW: GEOPDF PUBLISHER FOR ARCGIS PRO

## RECEIVE UPDATED MAP DATA FROM THE FIELD

Publisher, in combination with TerraGo Toolbar®, provides mobile field workers with the ability to share comments, complete forms and add photos, audio, video and multimedia to GeoPDF maps, imagery and data for round-tripping to analysts at headquarters to ensure the system-of-record is up-to-date with the most accurate and timely location intelligence and support informed decision making throughout the enterprise.

## MAXIMIZE THE VALUE OF GIS INFRASTRUCTURE

Publisher provides GIS analysts with greater control over the geospatial intelligence they create, ensuring that only relevant, timely and accurate information is shared with field workers and decision makers — even those without GIS training — to maximize the value of an organization's existing GIS infrastructure by allowing users to access, update and share intelligence, no matter where they are located.

## BENEFITS

- Extend the value of existing GIS systems to serve a wider audience
- Improve situational awareness & decision-making
- Increase analyst productivity through automated workflows
- Streamline communication with field personnel
- Create GeoPDF maps, accessible by anyone with Adobe Reader
- Instantly share GeoPDF with TerraGo Edge users on desktop, laptop and mobile devices
